KEYSTONE XL PIPELINE PROJECT

TRIBAL MONITORING PLAN

1.0 BACKGROUND

TransCanada Keystone Pipeline, LP (Keystone) has applied for a Presidential Permit for the Keystone XL Pipeline Project (Keystone XL Project or the Project). The Department of State (DOS) has determined that a Programmatic Agreement (PA) is necessary for the Project because the effects on potential historic properties cannot be fully assessed for all properties prior to the issuance of the Presidential Permit (if issued). Keystone is committed to working with the DOS and the consulting tribes to assist with the implementation of the PA, which includes identifying and minimizing project impacts on previously unidentified historic properties. For the purposes of this plan, the term “historic property” is defined as

Any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the NRHP maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian Tribe or Native Hawaiian organization and that meet the National Register criteria (see 36 C.F.R. § 800.16(l)(a))

Consistent with the PA and its associated coordination and treatment plans, Keystone will have completed the cultural resources surveys prior to Project construction. This allows for all appropriate avoidance, minimization, and treatment measures to be implemented and completed prior to construction.

The effort to identify and evaluate historic properties for the Keystone XL Pipeline Project has been aided by the completion of Traditional Cultural Property (TCP) reports by several tribes. All consulting tribes for this Project were afforded opportunities to prepare these studies so that the DOS could take into account the potential for the Project to affect historic properties of concern to tribes. The DOS distributed emails, mailed letters, conducted teleconferences, and also participated in face-to-face tribal consultation in group and individual settings to obtain information concerning historic properties that were of concern to Indian tribes. These efforts are summarized and documented in both the Final Environmental Impact Statement (EIS) as well as in Attachment G of the PA.

Arising from these efforts, the DOS has required, through Stipulation V.E. of the PA, that Keystone provide tribes the opportunity to participate as tribal monitors during construction to further reduce the potential for Project effects to previously unidentified historic properties. To assist with the implementation of the Unanticipated Discovery Plans (PA Attachment C), this Tribal Monitoring Plan describes the process by which tribes will participate in the implementation of these programs.

2.0 SUMMARY

Tribal monitors will be hired by Keystone to monitor specific areas during the grading and trenching activities related to Project construction. These areas have cultural significance and have been identified as a result of Cultural Resource Surveys and Inventories, TCP Studies conducted for the Project, and the Section 106 Consultation process. The areas where tribal monitoring will occur are identified in Appendix A. The tribal monitors are required to have adequate training to work on the right-of-way and must follow strict protocols developed by Keystone while in the field. For the Keystone XL Pipeline Project, the tribal monitors shall be selected by the individual tribes and recognized as having experience in the identification of historic properties. Their role will be to alert the Lead Environmental Inspector (EIs) of any previously unidentified historic properties uncovered during construction activities.

There will be clear lines of communication between the tribal monitors and Lead EIs. Tribal monitors will be required to keep detailed records of their activities through daily and weekly reports that are submitted to Keystone's Lead EIs.

3.0 OBJECTIVE

The objective of the Keystone tribal monitoring program is to develop a reasonable monitoring process while minimizing the potential for adverse effects from the Project activities to previously unidentified historic properties consistent with PA Stipulations V and VI as well as PA Attachment C. This Plan provides guidelines to assist in the decision making process when contracting with tribal monitors and to implement an effective communication system.

4.0 PROCESSES

The DOS, in consultation with the tribes, has determined the level of tribal monitoring for each spread of the Project. Specific areas requiring monitoring are listed in Appendix A. The DOS will be responsible for reviewing the qualifications of tribal monitors and the initial coordination with each tribe.

5.0 ENVIRONMENTAL INSPECTOR

Keystone has established clear lines of communication and reporting within the Project team and the environmental compliance organization. Ensuring compliance with the conditions of the PA is the responsibility of all members at all levels of the Project organization.

To facilitate Project compliance and monitoring, construction and environmental oversight at the spread level will be provided by the Project's Lead EI. The tribal monitor(s) on each Project spread will be required to report to the Lead EI during the Project. The Lead EI on the Project is assigned to coordinate the tribal monitoring program and will implement the activities below:

- Verify compliance with the requirements of the PA, including the Coordination Plan, Historic Trails and Archaeological Monitoring Plan, Unanticipated Discovery Plan (if applicable), and any Treatment Plans;
- Stop construction activities that are not in compliance with the PA; and
- Keep records and a daily log of compliance and activities performed pursuant to the PA.

Keystone will ensure that if the Lead EI does not meet the professional qualification standards established in the PA, the Lead EI will receive appropriate training in historic preservation from a professional who meets the standards established in the PA so that the PA requirements are understood and unanticipated discoveries are quickly identified. Keystone, for the same reason, will provide an appropriate level of training in historic preservation conducted by a professional who meets the standards established in the PA to all construction personnel (including new, added, as well as replaced workers). Keystone will conduct this training prior to initiating vegetative clearing or construction activities on a spread, and conduct periodic refresher training, as deemed necessary, during construction of the spread.

6.0 TRIBAL MONITORS

Tribal monitors will work collaboratively with Keystone's Environmental Inspection Team in an advisory role to assist the Project in achieving compliance with the PA, the Coordination Plan, this Monitoring Plan, Unanticipated Discovery Plan (if applicable), and any Treatment Plans to protect historic properties

that may be discovered during construction. Keystone will be responsible for administering the tribal monitoring program through a tribal liaison, Lead EIs, and the Keystone Project Team.

Position Description:

- During grading and trenching activities in the areas included in the tribal monitoring program, the tribal monitor will provide assistance with the identification of previously unidentified historic properties that hold significance to the Tribe.
- Tribal monitors will report and communicate directly with the Lead EI assigned to each work area and may not direct construction personnel or equipment.
- It is the responsibility of the tribal monitor to actively observe and report any artifact or human remains found either on the surface or subsurface within the Project boundaries to the Lead EI, as required by the PA and any applicable Unanticipated Discovery Plan. The Lead EI will notify the Project cultural resources specialist/archaeologist of the discovery. The cultural resources specialist/archaeologist will evaluate whether the find constitutes a potential historic property in accordance with the applicable State Historic Preservation Officer (SHPO) guidelines for the location and National Park Service (NPS) National Register Bulletins. The cultural resources specialist/archaeologist will evaluate whether the construction team is required to implement the Unanticipated Discovery Plan. If the cultural resource specialist/archaeologist determines the implementation of the Unanticipated Discovery Plan is required, information on the discovery will be provided to all consulting parties based upon the procedures in the Unanticipated Discovery Plans found in Attachments C of the PA.
- The tribal monitor is required to adhere to the PA and this tribal monitoring plan. The tribal monitor will report to the Lead EI if a previously unidentified historic property is discovered. The Lead EI will review the PA and this Plan with the tribal monitor so that the roles and responsibilities of the monitor and the Lead EI are clearly understood. The monitor may request a copy of this Plan and the PA for reference.
- Monitors are responsible for reporting daily and weekly activities that identify the areas and activities monitored during the week, describe any issues or concerns that were encountered, and describe how the issue/concern was resolved. Reports are expected to contain a description of the construction methods used, the type of cultural resource identified during monitoring, evaluation of the cultural resource recovered, any additional interpretation of the material recovered, and curation arrangements. Reports must be submitted in writing to the Lead EI. Keystone will summarize the results of the monitoring into reports that will be provided to the consulting parties on a weekly basis.
- Monitors are part of the construction team and as such, are required to participate in the safety and environmental training on site as well as in tailgate meetings. They must abide by all safety rules and wear personal protective equipment at all times while on site.
- At the start of each work day, tribal monitors must meet with the Lead EI at the applicable spread office at the prescribed time in order to receive daily safety and information briefings. Failure to attend the briefing will preclude the monitor's ability to participate on that day unless Keystone, at its discretion, is able to provide a supplemental briefing.
- Lead EIs will seek the advice and input of tribal monitors when unanticipated discoveries are encountered, if available, and will consider their input when implementing the terms of the PA and the Unanticipated Discovery Plan.

- If potential historic properties are encountered, the Lead EI will notify and seek advice from the Project cultural resource specialist/archaeologist as soon as practicable. The Project cultural resource specialist/archaeologist shall meet the *Secretary of Interior Professional Qualification Standards* and will act as a liaison between the tribal monitor, Lead EI, Tribal Historic Preservation Officers (THPOs), and other signatories and consulting parties, if determined necessary.

7.0 QUALIFICATIONS OF TRIBAL MONITORS

Credentials and qualifications of the tribal monitors shall be within the purview of the individual tribes and will be reviewed by the DOS. Only DOS approved tribal employees and/or tribal members may perform the work. The individuals selected will be officially recognized by each Indian tribe as having the capabilities to perform the duties as described in the job description. Keystone will work with the Indian tribes to articulate the responsibilities of the monitors and deploy them to optimize their role in reducing the potential for Project effects to historic properties. Indian tribes can also contract out monitoring work to other tribes who have qualified staff provided that each tribe officially delegates such authority in writing, stating that they endorse the candidate. Tribes are allowed only one representative and one alternate monitor, even if the monitor being proposed is from another tribe. If Keystone has more than one spread within the tribe's area of concern, the tribe may designate an additional monitor and alternate. Additional alternate monitors may be permitted if either of a tribe's monitors are unable to continue their participation in the Project. The DOS does encourage each Indian tribe to staff their monitors within their tribal members as a priority.

8.0 TRAINING

All monitors will be required to satisfactorily complete a one-day comprehensive training focused on the activities on the pipeline right-of-way. Completion of this program is compulsory. It is required that the monitors also attend the multi-day environmental/safety trainings provided to all on-site personnel.

All monitors will be required to attend the pre-construction training as coordinated by the prime contractor.

9.0 AREAS TO BE MONITORED

To facilitate construction, the overall pipeline route is divided into smaller sections, or spreads, of varying lengths. Construction, environmental, and tribal monitoring oversight at the spread level is provided by a team assigned to each spread. Tribal monitoring will be conducted in areas identified by TCP Inventories and Studies and/or areas identified by tribes during the Section 106 process as listed in Appendix A. There will be at least one and at most two monitors per spread depending upon the nature and locations of construction activities. If more than one tribe has identified an area that they would like to monitor, the tribes will meet and decide amongst themselves which areas will be monitored by which tribe. In some instances, it may be necessary for a tribe to designate more than one monitor and alternate to provide monitoring for all areas of concern for the tribe.

CONFIDENTIAL – FOR CONSULTING PARTIES TO THE KEYSTONE XL PROJECT

KEYSTONE XL PIPELINE PROJECT HISTORIC TRAIL AND ARCHAEOLOGICAL MONITORING PLAN

1.0 BACKGROUND

TransCanada Keystone Pipeline, LP (Keystone) has applied for a Presidential Permit for the Keystone XL Pipeline Project (Keystone XL Project or the Project). The Department of State (DOS) has determined that a Programmatic Agreement (PA) is necessary for the Project because the effects on potential historic properties cannot be fully assessed for all properties prior to the issuance of the Presidential Permit (if issued). For the purposes of this plan, the term “historic property” is defined as

Any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the NRHP maintained by the Secretary of the Interior. This term includes artifacts, records, and remains that are related to and located within such properties. The term includes properties of traditional religious and cultural importance to an Indian Tribe or Native Hawaiian organization and that meet the National Register criteria (see 36 C.F.R. § 800.16(l)(a)).

Consistent with the PA and its associated coordination and treatment plans, Keystone will have completed the cultural resources surveys so that appropriate avoidance, minimization, and treatment measures are implemented and completed prior to construction. Under Stipulation V of the PA, DOS prepared this Historic Trail and Archaeological Monitoring Plan (Monitoring Plan or Plan) to address cultural resources monitoring during the construction of the Keystone XL Project.

Keystone is committed to working with DOS, the consulting parties, the National Park Service (NPS) and other federal agencies further reducing the potential for impacts on historic trails and other historic properties including roads, ruts, archaeological sites, structures, buildings, natural landmarks, and the general cultural landscape. This Historic Trail and Archaeological Monitoring Plan is in addition to a Tribal Monitoring Plan. Both plans are required under Stipulation V of the PA and are appended to the Keystone XL Pipeline Project PA as separate documents. The Tribal Monitoring Plan shall not be construed as a substitute for, or in lieu of this Plan. All consulting parties and agencies have had opportunities to review and comment on these plans.

2.0 SUMMARY

Keystone will hire archaeologists to monitor specific areas during the ground disturbing activities related to Project construction. The locations requiring monitoring have been identified through past cultural resources surveys and inventories, surveys performed for this Project, and the Section 106 consultation process. A list of the areas identified by the NPS and SHPOs is included in Table 8-1 in this plan. Keystone will continue to coordinate with DOS during the Section 106 consultation process and will adhere to this Monitoring Plan should any other areas require cultural resources monitoring.

Monitors are required to meet the qualifications identified in Section 7 of this document, have adequate training to work on the right-of-way and must follow strict communication protocols while in the field.

The monitors will focus on the identification of previously unidentified historic properties (historic or precontact) during construction. These monitors will be positioned at specified locations during Project construction to monitor grading and/or trenching activities. The monitor’s role is to also provide assistance with the identification of materials related to the historic trails including roads, ruts, archaeological sites, structures, buildings, natural landmarks, and the general cultural landscape when working near the ELTE NHT.

3.0 OBJECTIVE

The objective of the historic trail and archaeological monitoring program is to minimize the potential for adverse effects to previously identified and unidentified historic properties from the Project activities and to assist with the implementation of the Unanticipated Discovery Plans in the PA. The HTAM Plan identifies the locations where monitoring is required, stipulates the cultural resource monitor qualifications and outlines a communication plan for the monitors in the event that previously unidentified historic properties subject to the Unanticipated Discovery Plan are identified.

4.0 PROCESSES

The locations requiring construction monitoring for this Project have been determined by the DOS in consultation with the NPS, SHPOs, Indian tribes, and other federal agencies and is based upon the survey work completed for the Project. Keystone will implement the monitoring work to assist the DOS in meeting its responsibilities under National Environmental Policy Act (NEPA) and Section 106 of the National Historic Preservation Act (NHPA). Keystone will continue to consult with DOS and will implement this Plan at additional locations, should it be determined that construction monitoring is required.

5.0 CULTURAL RESOURCE MONITORS

Cultural Resource monitors will work collaboratively with Keystone's Environmental Inspection Team in an advisory role to assist the Project in achieving compliance with the PA, including the Coordination Plan, this Monitoring Plan, the Tribal Monitoring Plan, Unanticipated Discovery Plan (if applicable), and any Treatment Plans to protect known historic properties (as defined by the SHPO in each state) that are eligible, or potentially eligible, for NRHP listing as well as historic properties that may be discovered during construction.

Position Description:

- During grading and trenching activities along the ELTE NHT in Texas and other areas identified in Table 8-1, the historic trail and archaeological monitors will provide assistance with the identification of historic properties that have not been previously identified.
- Monitors should review the mitigation plan and verify through field examination that areas requiring a reduction in active right-of-way space (necking down) or avoidance fencing are properly staged before construction work occurs.
- Monitors will report and communicate directly with the Lead EI assigned to each work area and may not direct construction personnel or equipment.
- It is the responsibility of the monitor to actively observe and report, as required by the PA and any applicable Unanticipated Discovery Plan, any potential historic property not previously identified through surveys or human remains found either on the surface or subsurface within the Project boundaries.
- Monitors are required to adhere to the PA and report to Keystone's Lead EI if a potential historic property is discovered that has not already been identified and deemed not eligible. Keystone will conduct the appropriate reporting to federal and state regulatory agencies as outlined in the PA communication protocol.

- Monitors are responsible for reporting daily and weekly activities that describes the areas and activities monitored during the week; any issues or concerns that were encountered; and how the issue/concern was resolved. The reports should be submitted in writing to the Lead EI. Monitors are part of the construction team and as such are required to participate in the safety and environmental training on site, as well as in tailgate meetings. They must abide by all safety rules and wear the required protective equipment at all times while on site.
- Construction will occur Monday through Saturday, and may under certain circumstances also occur on Sunday. Monitors are expected to be available during all work hours on those days.
- At the start of each work day, monitors must report to the Lead EI at the applicable spread office at the prescribed time in order to receive daily safety and information briefings. Failure to attend the briefing will preclude the monitor's ability to participate on that day, unless Keystone, at its discretion, is able to provide a supplemental briefing.
- Lead EIs will seek the advice and input of monitors, if available, when unanticipated discoveries are encountered, and will consider their input when implementing the terms of the PA and the Unanticipated Discovery Plan.
- If a potential historic property is encountered, the monitors will notify the Lead EI immediately.
- The cultural resources monitor shall meet the professional standards outlined in Section 6.0 of this Plan.

6.0 QUALIFICATIONS OF CULTURAL RESOURCE MONITORS

Historic trail and archaeological monitoring shall be carried out by or under the direct on-site supervision of a professional(s) archaeologist who meets, at a minimum, the Secretary of the Interior's Historic Preservation Professional Qualification Standards (48 FR 44716, September 29, 1983). In addition to maintaining these qualifications, the NPS has requested that the monitors positioned along the ELTE NHT must have experience in the identification and evaluation of National Historic Trails and related resources. All monitors should have demonstrated experience in monitoring construction activities and be knowledgeable of changes in soil color and deposition that may be associated with cultural materials. Should monitoring occur on BLM managed lands, all monitors must have a valid Archaeological Resources Protection Act (ARPA) permit or be included on a BLM-approved ARPA permit.

7.0 TRAINING

All monitors will be required to satisfactorily complete a one-day comprehensive training focused on the activities on the pipeline right-of-way. Completion of this program is compulsory. It is required that the monitors also attend the multi-day environmental/safety trainings provided to all on-site personnel.

All monitors will be required to attend the pre-construction training as coordinated by the prime contractor prior to any monitoring activity. The training program consists of two phases: environmental training and safety training. These training programs are conducted by the Keystone prime contractor's environmental and safety professionals and will commence in the morning of the first day of monitoring for each spread.

8.0 AREAS TO BE MONITORED

The locations requiring construction monitoring has been determined by the DOS in consultation with the NPS, SHPOs, and other consulting parties. Historic trail and archaeological monitoring will be conducted in an area approximately 500 feet in length that is located immediately south of access road CAR1130 near MP 332.7 along the ELTE NHT in Nacogdoches County, Texas. This specific location was identified during an on-site meeting that included DOS, NPS, Keystone XL representatives and Jeff Williams (a representative from Stephen F. Austin University). Actual location and exact length of monitoring will be determined in the field in consultation with the cultural resources monitor and the Lead EI. Additional areas are outlined in Table 8-1 in this document. Keystone will implement this Monitoring Plan to assist the DOS in meeting its responsibilities under NEPA and Section 106 of the NHPA. Keystone will continue to consult with DOS and will implement this Plan at additional locations, should it be determined that construction monitoring is required.

8.1 Cultural Resources Monitoring – State-by-State

Table 8-1 indicates specific areas near previously identified historic properties (and potential historic properties) that DOS recommends for archaeological monitoring. If the specific area is avoided prior to construction, then no monitoring of that area is required. Additional potential historic properties may be identified as the Section 106 Process continues. Monitoring is recommended in the following circumstances:

- Where construction activities will not directly impact a known site, but occur immediately adjacent to one or more sites;
- To ensure site avoidance;
- To ensure that site boundaries have been correctly defined; and
- During ground-disturbing activities along NRHP-eligible segments of the ELTE NHT in Texas.

The monitoring areas in Montana, South Dakota and Nebraska have been defined by multiple surveys carried out for the centerline, access roads, and ancillary facilities. Monitoring in all of these instances has been proposed by the applicant and agreed to by DOS. In Texas, where High Probability Areas (HPAs) were identified, all HPAs were field-verified and subjected to a 100-percent cultural resource surveys. In addition, moderate probability areas and high-potential landforms were ground-truth. If any important archaeological resources were identified, avoidance of these sites was recommended. Additionally, avoidance is recommended of significant archaeological and architectural resources with yet unknown National Register eligibility status. In an attempt to determine the need for monitoring in HPAs, backhoe trenching was employed in all areas with the potential for intact deeply buried soils or cultural materials.

9.0 COMMUNICATIONS

Keystone has established clear lines of communication and reporting within the Project team and the environmental compliance organization. To facilitate construction compliance and monitoring, the overall pipeline route is divided into smaller sections, or spreads, of varying lengths. Construction and environmental oversight at the spread level is provided by a team assigned to each spread. Cultural resource monitors will be required to report to the Lead EI responsible for the spread within which the work is taking place. The Lead EI will coordinate the construction monitoring program.

Keystone will be responsible for administering the Monitoring Plan and will retain cultural resource monitors that meet the Professional Qualifications noted in Section 7 of the PA.

Historic trail and archaeological monitors will work together with Lead EIs to assist in reducing effects to previously identified and unidentified historic properties and perform monitoring activities in areas targeted prior to construction. If a historic trail that is also a potential historic property is discovered, the parties will follow the terms of the communications protocol established in this document, the PA, and all local, state and federal laws governing the protection and discovery of archaeological and cultural resources. Historic trail and archaeological monitors will communicate with the Lead EI assigned to each work area and will not direct construction personnel or equipment. The authority to stop work will rest the Lead EI and Keystone construction and Project management team.

At the start of each work day, historic trail and archaeological monitors will report to the Lead EI they are assigned to at the prescribed time in order to receive daily safety and information briefings. Failure to arrive at the designated briefing time will preclude the monitor's ability to participate on that day unless Keystone, at its discretion, is able to provide a supplemental briefing. Lead EIs will seek the advice of historic trail and archaeological monitors, if available, when unanticipated discoveries are encountered, and will consider their input. If any issues develop, monitors will communicate with the assigned Lead EI.

10.0 REPORTING

Monitors will be required to complete written daily reports and weekly activity reports that describe the areas monitored and will provide the reports to the Lead EI. The reports will describe methods used, the findings during monitoring, evaluation of the cultural material recovered, any additional interpretation of the material recovered, and curation arrangements. Those reports will be compiled and given to the Lead EI. Copies of the monitor's reports will be forwarded to DOS, the applicable SHPOs, and NPS for areas where monitoring is occurring at NHT's and other locations identified in Table 8-1.

Attachment G

Summary of Identification and Evaluation Efforts and Effect Assessment for Historic Properties within the Project APE and Consultation with Indian Tribes and Nations, SHPOs, and Other Agencies

ATTACHMENT G
Summary of Identification and Evaluation Efforts and
Effect Assessment For Historic Properties within the Project APE
(As Found in the Final Environmental Impact Statement)

Overview

This attachment summarizes the cultural resource identification and evaluation efforts conducted to date for the Keystone XL Project. This preface is followed by state-by-state summaries of identification and evaluation activities as well as the Project effects assessment for resources within each state. Due to the large amount of site data, site-by-site findings can be reviewed in the FEIS in Section 3.11.3.1.

Since 2008, DOS has consulted with affected Indian tribes, SHPOs, federal agencies, and local governments regarding the proposed Project as required by Section 106 of the National Historic Preservation Act. As part of this consultation effort, DOS has conducted formal government-to-government consultation meetings with 95 Indian tribes, in addition to inviting all interested tribes to prepare traditional cultural property (TCP) studies. Nine Indian tribes have completed TCP reports for the Project.

DOS, nine federal agencies, the Advisory Council on Historical Preservation, two Montana state agencies, six SHPOs, and Indian tribes assisted in the development of a Programmatic Agreement (PA) that allows for the continued identification and evaluation of cultural resources, if the Project is permitted. The PA outlines the appropriate consultation and notification procedures to be followed prior to and during construction. The PA also ensures that cultural resource surveys are conducted within the entire Project area prior to construction.

The proposed Project route was selected to avoid disturbing historic properties (i.e. resources that are eligible for, or listed in the National Register of Historic Places) to the maximum extent possible. Adverse effects to historic properties from construction at some Project locations may occur due to the lack of feasible routing alternatives or alternative construction methods. Treatment measures for these direct or indirect impacts shall be implemented on an individual site basis as noted in the PA. In addition, unidentified archaeological sites or historic properties may be adversely affected as a result of Project-related activities. If unanticipated cultural materials or human remains are encountered during construction, Keystone will follow the procedures outlined in the Unanticipated Discovery Plans that have been developed for all six states in coordination with their State Historic Preservation Officer (SHPO). Tribal and Archaeological Monitoring Plans have also been developed and will be implemented to further reduce the potential for adverse effects to cultural resources. Treatment Plans will be developed for those historic properties that cannot be avoided by construction activities.

Montana

Cultural resource pedestrian surveys and inventories have been conducted in Montana. This work is discussed in the main Class III Cultural Resources Survey conducted for the state and in five subsequent addendum reports submitted to the Montana SHPO. For those resources situated in the APE, Keystone is attempting to identify feasible alternative reroutes around the resources

or identifying alternative construction methods to avoid or minimize effects. Several stone circle sites may be adversely affected by the Project, however, Project planning is ongoing and these sites may be avoided by Project modifications. If these sites are adversely affected, Keystone will follow the protocols of this PA and prepare a Treatment Plan for each site that is adversely affected. Due to the proximity of the Project to other identified sites, archaeological or tribal monitoring may also be used to ensure adequate measures are undertaken to avoid or minimize Project effects to historic properties.

As of June 2011, 1.3 miles of the proposed Project centerline, 7.5 miles of route variations, 0.51 mile of access roads, and one rail siding in Montana need to be surveyed for historic properties due to a lack of owner permission to access the property. Once owner permission is obtained, the remaining areas will be surveyed and documented in future reports. Since the last report submittal, 0.01 mile of Project centerline, 0.7 miles of route variations, 6.1 miles of access roads, and two rail sidings have been surveyed, but the reports for this work are currently in preparation. The cultural resource surveys for proposed Project route variations, gap analysis, and extra work spaces will be documented in future reports. Upon receipt, DOS will review these reports consistent with 36 CFR Part 800 and the PA.

South Dakota

Cultural resource pedestrian surveys and inventories have been conducted in South Dakota. This work is discussed in the main Level III Cultural Resources Survey conducted for the state and in six subsequent addendum reports submitted to the South Dakota SHPO. For those resources situated in the APE, Keystone is attempting to identify feasible alternative reroutes around the resources or identifying alternative construction methods to avoid or minimize effects. If these sites are adversely affected, Keystone will follow the protocols of this PA and prepare a Treatment Plan for each site that is adversely affected. Due to the proximity of the Project to other identified sites, archaeological or tribal monitoring may also be used to ensure adequate measures are undertaken to avoid or minimize Project effects to historic properties.

As of June 2011, 1.8 miles of the proposed Project centerline and 0.6 mile of access roads need to be surveyed for historic properties due to a lack of owner permission to access the property. Once owner permission is obtained, the remaining areas will be surveyed and documented in future reports. Since the last report submittal, 0.5 miles of route variations, 0.1 miles of access roads, and one rail siding have been surveyed, but the reports for this work are currently in preparation. The cultural resources surveys for proposed Project route variations, gap analysis, and extra work spaces will be documented in future reports. Upon receipt, DOS will review these reports consistent with 36 CFR Part 800 and the PA.

Nebraska

Cultural resource pedestrian surveys and inventories have been conducted in Nebraska. This work is discussed in the main Phase I Cultural Resources Survey conducted for the state and in six subsequent addendum reports submitted to the Nebraska SHPO. For those resources situated in the APE, Keystone is attempting to identify feasible alternative reroutes around the resources or identifying alternative construction methods to avoid or minimize effects. If these sites are adversely affected, Keystone will follow the protocols of this PA and prepare a Treatment Plan

for each site that is adversely affected. Due to the proximity of the Project to other identified sites, archaeological or tribal monitoring may also be used to ensure adequate measures are undertaken to avoid or minimize Project effects to historic properties.

As of June 2011, 2.65 miles of the proposed Project centerline were not surveyed due to lack of owner permission to access the property. As of May 2011, 1.05 miles of access roads and 60.3 acres of ancillary facilities in Nebraska were not surveyed due to a lack of owner permission to access the property. Once owner permission is obtained, the remaining proposed Project areas will be surveyed and documented in future reports. The cultural resource surveys for the proposed Project route variations, gap analysis, and extra work spaces are anticipated and will be documented in future reports. Upon receipt, DOS will review these reports consistent with 36 CFR Part 800 and the PA.

Kansas

Cultural resource pedestrian surveys and inventories have been conducted in Kansas. This work is discussed in the main Phase II Cultural Resources Survey conducted for the state and in one subsequent addendum report submitted to the Kansas SHPO. No historic properties are situated in the Project APE for Kansas.

No additional cultural resources survey work is currently planned in Kansas.

Oklahoma

Cultural resource pedestrian surveys and inventories have been conducted in Oklahoma. This work is discussed in three main reports documenting the Cultural Resources Inventory conducted for the state and in one subsequent addendum report submitted to the Oklahoma SHPO. For those resources situated in the APE, Keystone is attempting to identify feasible alternative reroutes around the resources or identifying alternative construction methods to avoid or minimize adverse effects. If sites cannot be avoided, Keystone will follow the protocols of this PA and prepare a Treatment Plan for each site that will be adversely affected. One historic property, the Holdenville Airport will likely be adversely affected by the Project. Treatment measures are being developed in consultation with the Oklahoma SHPO to mitigate for this adverse effect. Due to the proximity of the Project to other identified sites, archaeological and/or tribal monitoring may also be used to ensure adequate measures are undertaken to avoid or minimize Project effects to historic properties.

As of June 2011, 0.84 miles of proposed Project centerline, 2.65 miles of access roads, 3.49 acres of temporary workspaces, and 100.32 acres of ancillary facilities in Oklahoma could not be surveyed, due to a lack of landowner permission to access properties. Once owner permission is obtained, the remaining proposed Project areas will be surveyed and documented in future addenda reports. Surveys are ongoing. Upon receipt of the additional information, DOS will review the addenda reports consistent with 36 CFR Part 800 and the PA.

Texas

Cultural resource pedestrian surveys and inventories have been conducted in Texas. This work is discussed in five main reports documenting the Cultural Resources Inventory conducted for the state and in one subsequent addendum report submitted to the Texas SHPO. For those resources situated in the APE, Keystone is attempting to identify feasible alternative reroutes around the resources or identifying alternative construction methods to avoid or minimize adverse effects. If sites cannot be avoided, Keystone will follow the protocols of this PA and prepare a Treatment Plan for each site that will be adversely affected. Due to the proximity of the Project to other identified sites, archaeological and/or tribal monitoring may also be used to ensure adequate measures are undertaken to avoid or minimize Project effects to historic properties.

As of June 2011, 1.89 miles of HPAs along the proposed Project centerline, 1.01 miles of access roads, 14.94 acres of temporary workspaces, and 107.10 acres of ancillary facilities along the Gulf Coast Segment could not be surveyed due to a lack of landowner permission to access the properties. For the Houston lateral 7.96 miles of survey area could not be surveyed due to a lack of landowner permission to access the properties. Once owner permission is obtained, the remaining proposed Project areas will be surveyed and documented in future addenda reports. Upon receipt, DOS will review these reports consistent with 36 CFR Part 800 and the PA.

Tribal Consultation

In an attempt to identify properties of religious and cultural significance, including Traditional Cultural Properties (TCPs), the DOS conducted an extensive tribal consultation effort.

Consistent with 36 CFR Part 800, DOS has engaged Indian tribes in government-to-government consultation. The list of Indian tribes that were notified for this proposed Project was derived from lists maintained by DOS, BLM, USACE, SHPOs, state tribal liaisons, THPOs, the BIA, and recommendations from other Indian tribes. In compliance with 36 CFR 800.2 and confidentiality requirements, DOS provided consulting Indian tribes with findings or determinations that were derived from historic properties reports prepared for portions of the proposed Project's APE. Indian tribes initially were invited to consult regarding the proposed Project by letters dated January 30, 2009. Additional tribal members identified by the BLM were invited to consultation by letters dated February 19, 2009. Another letter from DOS dated April 1, 2009 again invited Indian tribes that had not yet responded to the invitations. Phone calls were also made on March 18 through March 23, 2009 to Indian tribes that had not yet responded.

Following these invitations, 45 Indian tribes notified DOS that they would like to become consulting parties. Additionally, two Indian tribes are undecided and have been participating in calls and meetings. Nineteen Indian tribes have notified DOS that they do not wish to consult on the proposed Project and/or have no objection to the proposed Project, but would like to be notified should human remains be found. Twenty-seven Indian tribes did not respond to requests for consultation. Indian tribes that DOS contacted are listed in Table 1 and the list of consultation meetings is included in Table 2.

To facilitate consulting party participation in Section 106 consultation, DOS has conducted government-to-government and agency consultation meetings in both the Steele City Segment

and the Gulf Coast Segment of the proposed Project. Steele City Segment meetings were held in Rapid City, South Dakota (May and July 2009) in Pierre, South Dakota (February 2010), in Billings, Montana (October 2009 and June 2010), and near Malta, Montana (October 2009). Gulf Coast Segment meetings were held in Oklahoma City, Oklahoma (May and July 2009), in Dallas, Texas (November 2009) and in Tulsa, Oklahoma (June 2010). Transcripts for all of the meetings held to date have been prepared and distributed to the consulting parties. DOS also held a Section 106 consultation meeting in Washington, D.C. in December 2010.

The Indian tribes listed in Table 3 have submitted scopes of work (SOW) to DOS to conduct TCP studies within the proposed Project APE. DOS reviewed and approved the SOWs and draft reports provided by the tribes. Five tribes withdrew offers to complete the TCP studies. All of the remaining studies have subsequently been completed and the majority of the studies have been finalized. DOS continues to consult with the tribes in regards to recommendations made in these reports concerning the eligibility of a historic property and/or proposed Project effects. DOS will make determinations of eligibility and proposed Project effect and attempt to resolve any adverse effects to historic properties. In the report prepared by the Pawnee Nation, sites of cultural significance including in the Horse Creek District, the Platte River District, and at the Big Blue River Valley crossing have been identified. DOS is working with the Pawnee Nation and the Nebraska SHPO to address these issues.

TABLE 1		
Tribes Consulted under Section 106 for the Proposed Project		
	Interested/Consulting Party	Tribe
1	Yes	Absentee-Shawnee Tribe of Indians of Oklahoma
2	No	Alabama Quassarte Tribal Town

*Prepared and funded by NPS.

Federal and State Agency Consultation

In compliance with NEPA and Section 106, DOS has consulted with federal agencies whose participation in the proposed Project was considered an undertaking as per 36 CFR 800.16(y). These agencies include BLM, the Bureau of Reclamation (Reclamation), Western, RUS, NRCS, FSA, BIA, and USACE. The ACHP has also formally entered into consultation with DOS. DOS has also consulted with the NPS due to agency interest in the proposed Project. In coordination with DOS, each of these agencies are reviewing the cultural resource findings as appropriate given their Section 106 responsibilities.

DOS is also consulting with state agencies, including the SHPOs in the six states crossed by the proposed Project corridor as well as the Montana DNRC and the Montana DEQ, who is the lead for the Montana Environmental Policy Act (MEPA). Consultation has occurred with these groups in person as well as by email, and teleconference. Several agencies have attended the agency and tribal Section 106 consultation meetings held in May, July, October and November 2009 and February, June and December 2010.
